

CRISTIAN JUPIA

Technical Lead · Full-Stack & WordPress Developer · Agentic Coding (Claude Code)

Metro Manila, Philippines | cristian.jupia13@gmail.com | linkedin.com/in/cristian-jupia

PROFESSIONAL SUMMARY

Technical Lead and **WordPress Developer** with **11+ years** building and shipping web products end to end: UI/UX, front-end and full-stack development, deployments, server maintenance and production support. Most recently Technical Lead at Ayahtek, delivering **Philippine government systems for the PNP and DOJ** and the company's own SaaS products. I take on **multiple roles, including Technical Lead, Project Manager and QA**, carrying a project from requirements to tested production releases. I've also built and maintained **WordPress sites for clients in Australia and the Netherlands**. I work in an **agentic AI workflow with Claude Code** (context engineering, custom skills, MCP tool integration and browser-automated testing), which lets me ship quality software in days instead of weeks while I review and test every change.

CORE SKILLS

Agentic Coding	Claude Code · Model Context Protocol (MCP) · Context engineering · CLAUDE.md & persistent memory · Custom skills & plugins · AI-assisted code review · Codebase knowledge graphs · Browser-automated UI testing
WordPress	WordPress development · Elementor · WooCommerce · Custom themes · Builds from scratch · Redesigns · Plugin setup · Maintenance & UI updates · Hosting & performance
Front-end	HTML5 · CSS3 · JavaScript · TypeScript · React · Angular · Vite · Tailwind CSS · Responsive / mobile-first · PWA & offline sync
Back-end & DevOps	Node.js · Express · PHP · REST APIs · MySQL · DigitalOcean · Ubuntu Linux · Staging & production deployments · HTTPS/TLS · Git & GitHub
Leadership & Delivery	Technical leadership · Project management · QA & release testing · Requirements gathering · Client communication · UI/UX design

PROFESSIONAL EXPERIENCE

Ayahtek Corp — Jan 2021 – 2026

Technical Lead *(also Project Manager / QA as needed)* — Feb 2022 – 2026

- **Philippine government projects:** led the technical side of delivery, built parts of each system myself and handled deployments to staging and production.
  - **PNP: EDPPAS**, a mobile clock-in app that syncs attendance after working offline; PPOAS (Pensioner Online Accounting System); PARPS (Automated Retirement Processing System); and the LBCOOP cooperative management system.
  - **DOJ:** CMS (Case Monitoring System) and OPCAS (Online Prosecutor Clearance Automation System).
- **Company products:** Empleo (an all-in-one HR system, live), Liftnow (contributor) and Siklab (a service where musicians write custom songs for customers).
- Managed servers and releases on **DigitalOcean (Ubuntu)**: kept live environments stable, fixed production issues, and covered project management and QA testing before each release.

UI/UX Developer — Jan 2021 – Feb 2022

- Designed and built the UI of **Qure.ph**, and developed the **PRBS** website in WordPress.

Freelance — Clients in Australia, the Netherlands & more

WordPress Developer

- **Built from scratch:** smallbizoptimize.com, obesity.karmicartworks.agency, ayahtek.com
- **Developed:** torosroadworthy.com.au, thuiszorgdezonnekracht.nl, kor.brandmerk-reclame.nl
- **Redesigned:** lunarnest.com.au
- **Maintenance & UI updates:** karmicartworks.com.au, brandmerk-reclame.nl

Solutions Resource Inc. Nov 2014 – Feb 2020 · 5 yrs 4 mos

Associate Team Lead (Software Development Engineer II) Aug 2018 – Feb 2020

- Led front-end development of the **Pioneer Insurance Assets and Management System**, an enterprise web application for a major Philippine insurer, in a three-person team. Coordinated tasks, reviewed code and was the team's technical point of contact with the client.

UI/UX Designer & Front-end Developer · Web Designer & Developer ***(started as intern)*** Nov 2014 – Feb 2020

- Designed and built **10+ websites** for clients in government, media, logistics, advertising and services, from wireframes to responsive builds. They include the **National Book Development Board (NBDB)**, **Gaffco Manila**, **BIZibility**, **ASPAC**, **Bio-Tech Environmental Services** and **D5 Studio**.

TV5 Media Center Jan 2016 – Mar 2018

Front-end Developer ***(deployed by Solutions Resource)***

- Built front-end features for **News5**, TV5's online news portal, and developed **TV5 Bilang Pilipino**, the 2016 Philippine election portal with candidate profiles and live updates.

AGENTIC CODING CLAUDE CODE

Jups Fintrack: full-stack household finance app built with Claude Code Oct 2026

React · TypeScript · Vite · Tailwind · Express 5 · MySQL 8 · Service Worker · Google Apps Script

- Shipped a full-stack finance web app, now in daily household use, in **4 days (16 commits)** with an agentic Claude Code workflow. I specified, reviewed and tested every change.
- **Works offline on phones:** the service worker caches data, and changes made offline queue up and sync in order once the connection is back. HTTPS runs on a self-generated home certificate authority so the app installs on iOS and Android.
- **Integrations:** Google Sheets sync through Apps Script (protected against formula injection), and an xlsx/csv import with duplicate detection that brought in **~670 records** from spreadsheets.
- **Guardrails:** every write asks for confirmation first, schema changes migrate automatically, secrets stay out of Git, and the agent runs UI tests in a real browser through **MCP**, checking that test runs leave the data unchanged.

How I work with AI coding agents

- **Context engineering:** project-level **CLAUDE.md** instructions plus a **persistent Markdown memory vault** (PARA structure) that records decisions, gotchas and open items, so the agent picks up work where it left off.
- **Extending the agent:** installed and configured **skills and plugins**, including codebase **knowledge graphs** (graphify) for impact analysis, a lean-code review plugin, and repeatable work patterns such as investigate-first, surgical-patch, safe-refactor and verify-and-stop.
- **Disciplined loop:** plan, build, typecheck, test in a real browser at phone and desktop widths, then record what was learned. The result is faster delivery that doesn't give up quality, security or accessibility.

EDUCATION & CERTIFICATION

Bachelor of Science in Information Technology · STI College Novaliches 2011 – 2015

HTML/CSS and JavaScript · TestDome (Credential ID 875b87d8...eab3) Nov 2020
